

Número de pieza 2508-0079

A 3D rendering of a grey industrial connector. It features a large, circular flange on the left side with four mounting holes. A central threaded rod passes through the flange and the main body of the connector. The main body is cylindrical and tapers towards the right. Two green O-rings are visible, one on the threaded rod near the flange and another further down the body. The background is white with a faint 'KEPINGER' watermark.
